## *'Strawberry Fields for Rover'*

### City Council approves recommendation for off-leash park in north Marysville

The Parks and Recreation Advisory Board studied development of an off-leash dog park facility for the past year and forwarded its advisory vote to the City Council for approval.

The recommendation puts a three-acre off leash facility at Strawberry Fields Athletic Park on unimproved land in the park's south end, located at 6100 152nd St. NE.

The Council approved the project as an interim use of the site, which was purchased to develop additional athletic fields when funding is available.

Off-leash park construction will begin late this summer, says Director of Parks Jim Ballew, with help from community volunteers and members of the Marysville Dog Owners Group (M-DOG), a local nonprofit off-leash organization formed to assist in the park's development and daily maintenance. The park will be completely enclosed with fencing, and will include a drinking fountain designed for both pets and owners. The fountain was donated by HomeStreet Bank of Marysville. HomeStreet has also donated information kiosks and an outdoor pavilion currently in use at the soccer park.

Ballew emphasizes the site may be temporary and is considered an interim use. The Parks Department supports the installation and will monitor use for any environmental impacts or overall use issues, then report back to the Council.

The Strawberry Fields for Rover Off Leash Park will be open to the public at no charge from 7 a.m. to dusk daily. Visitors will be required to have their dogs on leash while walking to the site. Dogs are not permitted on the soccer fields. Citizens interested in assisting in the park are encouraged to contact MDOG at (360) 651-0633 or by e-mail at dbuell@marysvillewa.gov, or call Marysville Parks and Recreation at (360)363-8400.

### City Council OKs extra improvements to Strawberry Fields Soccer Fields

This August, the three full-sized soccer fields at Strawberry Fields will be renovated with installation of a comprehensive drainage system. The project will be carried out by Aquajet Inc. of Mount Vernon and financed with aid from a Youth Athletic Fund Grant (YAF) from the Recreation Conservation Office of Washington State and Park Capital funds. The project will also include installation of a deflection net system to keep errant balls on the field and out of the parking areas and roadway.

When the fields were originally developed in 2005, drainage systems were not installed due to cost issues. The health of the fields has been challenged and the YAF grant has provided support to accomplish the project at a savings of 50%, according to Parks Director Jim Ballew. This project will greatly enhance our fertility program and increase the season for soccer in Marysville as fields will be relieved of standing water and high water table issues. The three-week project also includes a partnership with Marysville Youth Soccer who will assist in final repairs to the park before play can resume.

"We hope to complete a field each week and be at full strength in November," Ballew says. The fields will be closed through most of October for re-seeding efforts, but nearby trails will be open.
